

The best
because
we care

Technology with
the power to
connect people,
care and business

About Leecare

Care. It's in our name and at the very core of what we do. It all began in 1992 when Dr Caroline Lee commenced working as a Nurse Advisor with care services under sanctions or non-compliances and identified a simple need – to always put people at the centre of health and support software systems – residents, staff and management.

The outcome was Leecare, an organisation that boasts a rich history of supporting, social, health and care providers to demonstrate and provide the highest standard in health, residential, retirement and supported living care, through consulting and technology. Today, our 1,000+ clients include small independent businesses to larger corporate multi-site organisations across Australia, New Zealand, Singapore, UK, China and Africa.

What makes us the experts? Over 30 years' experience has given Leecare the knowledge and insight to become the leader in this field, with a richness of program content only achieved after many years of client and auditor liaison. Equally as important has been the development of our single platform, single DB, Platinum6 Suite – an unparalleled clinical, care, lifestyle, medication, operations and financial management software solution specifically created for the health and social care sector, linked to “at point of care” Apps.

Simple, secure and customisable, the Platinum6 Suite leverages the latest technology to bring you a fully integrated Electronic Health and Care Record (EHR) platform whilst also providing everything you need to manage the business of care. One central location, one integrable database – anywhere, any time and on any commonly used device. It's that easy to ensure congruency across all systems.

Proud as we are of our award-winning software, we believe that the ability to deliver exceptional care calls for the human touch as much as technology. Like you, we want life for all people to be the very best of experiences. That means ensuring tools and functionality that work for all stakeholders - clients/residents and their families, along with staff, managers and board members.

Together, we can achieve quality care and support goals.

Dr Caroline Lee
Leecare Founder

“We want to support our clients,
so the people they support can
experience the best possible
quality of life.”

Dr Caroline Lee, CEO and Founder, Leecare Group of companies

Absolutely everything you need in a single platform? Yes, it's possible

Quality data, quality indicator 'views', simple functionality.

Introducing Leecare's Platinum6 Software and App Suite.

Created with care of the person, staff and management in mind. Across the world, Platinum6 remains the health and social care industry's leading mobile App and web browser-based system.

Platinum6

Powerful, feature-rich and customisable, Platinum6 enterprise software is performance enhanced, secure, and offers a range of analysis views created by our experienced, in-house team of developers and data analytics experts. From individualised schedules, assessments, care plans and medication management to swift business intelligence analytics, financial, administrative and operational functions – Platinum6 seamlessly integrates to manage all your organisation's clinical, care, social support, business, medication management, operational and best practice standards' requirements.

Together with App smarts, Platinum6 also offers simplicity. We provide you with an intuitive, user-friendly system that's been proven, by staff in over 1,000 implementations, to streamline and centralise information –ensuring your data is congruent and linked in real time, to easy to use Apps, easily available when and where you need it.

Shared knowledge, greater intelligence, faster, better, simpler and smarter technology. This is how Leecare assists your organisation to deliver the best care in the business. Let our Platinum6 platform support your success.

10 reasons to choose Platinum6

01 A single, integrated centralised solution

Platinum6's integrated platform provides care delivery management at your fingertips. Schedules, care plans, medication admin, accounting, HR and operational systems are housed in one centralised place, with a single database. A connected ecosystem to be shared by your entire organisation, profiled at the single service or organisational level - your choice. Linked easily to other systems using our generic API. SSO ✓ LDAP ✓ MAF ✓ Security ✓

02 On Premise or in the Cloud

Clients choose. Installed on your premises, in the Leecare Cloud, or in the clients' own cloud.

03 Analytics & Transparency

Platinum6 includes data integration and business intelligence, delivering critical oversight for management with configurable comprehensive management reporting tools and features. Our business intelligence content and BI views provides visibility of your organisation's outcomes and needs.

04 Your secure information in real time

Your details are always available in real time. From real-time communication amongst care and nursing staff, management, doctors, other health professionals and pharmacists to tracking changing care needs, your team can connect and function with live insights. Access records, reports, alerts and messages as they occur whether data is entered via the program or our Apps. Determine which reports are emailed to you and how frequently.

05 Easy to use, responsive design

Platinum6 is all about simplicity. Web browser-based with integrated real time Apps, our user-friendly interface is intuitive and easy to operate for users of all levels. Our dashboards are simple to navigate, with data in an easy to read, insightful format. Designed to work with your existing hardware and infrastructure, use any browser, any platform and any device – the choice is yours.

Flexible, advanced technology

06

Platinum6 is configurable to suit your business workflow, content and reporting needs. Our client managed forms and reports builders allow your team to customise and add to the provided assessments, reports and care plans, which auto update our Apps so you control your Apps also. Manage access and user groups, make changes to settings and alerts, tailor Platinum6 to your own needs or just use our person centered systems. Our solution works the way you do.

Save time through automation

07

Platinum6 reduces your daily processes and administrative burden. View congruent schedules and data. Document electronically via desktop computers, laptops or mobile devices. View a single central record for each person. Staff only need to enter information once with data flowing throughout the system to eliminate duplication. Current and past information, reports and care plans can all be generated in an instant.

Securely access anywhere, anytime

08

Your Platinum6 system is mobile and can be used anywhere, enabling you and your team to record or view critical information and access all records, regardless of location. No matter where you need to be or when, Platinum6 provides the information you need, right then and there.

Quality indicators, care statements

09

In-built dashboards, configurable quality reporting, data analytic "views" and pre-set statements support your quality indicator monitoring and care decision-making. This congruent information is then available to clients in easy to use Apps and reporting functions.

Experience and Responsiveness

10

We pioneered IT solutions in 1992, and remain the market leaders, using our expertise and rich local and international health and social care experience. We are responsive to all government and professional changes in the jurisdictions in which we operate.

Products

Platinum6

Access to all your assessment, care plan and reporting data at the point of care from pre-admission to separation

Platinum6 is the most advanced care software in the industry

Features

Client statements

Platinum6 provides easy to access reports and views to provide residents/clients or their families, auto-created from your assessment data.

Superior clinical and corporate governance

Platinum6's evidence-based tools and alerts dashboard, evidence your outcomes and support your organisation during audits and inspections.

All about the resident/client

Platinum6 and our Apps focus first on the single resident/client view, then collates that assessment care, progress and reporting data into organisational reporting - staff don't ever have to duplicate records.

Identify key issues instantly and clinical intelligence

Platinum6's clinical intelligence dashboard enables instant reports and alerts to assist monitoring and managing eg. incidents, infections, wounds, weights and vital signs out of reportable ranges.

Configurable automated controls enforcing policies

Staff messaging, task and event scheduling, customisable alerts and workflow, minimise errors and omissions in a heavily monitored and scrutinised sector.

Ease of use

The Platinum6 Suite utilises open standard technologies, specifically engineered for advanced touch screen devices that all staff are familiar with.

P6Exec

Governance with ease

Supporting your operations with all management and safety system requirements

Features

All management and safety systems' standards covered

Our configurable system has been designed to reflect the way your organisation manages risk, staff and your business.

Maintenance and inventory, suppliers, assets and stock

P6Exec's comprehensive resource and maintenance management system is linked to your organisation's structure, suppliers and assets. Record and track preventative and corrective maintenance tasks, monitored against individual assets, including Retirement Villas, and suppliers, stock management and reporting.

Incidents, hazards and risks

P6Exec's Incidents, hazards and risks' alerts mechanisms link managers and staff to immediate issues so they can be managed in a timely manner and analysed further.

Quality and continuous improvement

Use our QI/CI module to record actions for reported issues, guide discussions in team meetings and loop in the right people via Platinum6 Exec's linked Message and Events/Tasks Centre. All quality reporting requirements are covered.

Document control

Manage all your internal documents, records and reports in an easy to search and manage, document control system.

Credentials and education

Alerts advise any due education or mandatory certificates/registrations. Details of completed education or credentials auto appear on staff 'home pages', planned events auto set up staff calendar and messages.

P6Med

The right medication, right dose, right route, right time, every time

P6Med is a complete medication management system to help staff achieve an error-free prescribing and administration process with eprescribing and eNRM

Features

Safer, efficient, effective care

Seamless, real-time integration of data with Platinum6 prevents adverse events with automated notifications, allergy and key administration information displays. Key care management details such as swallowing difficulty, incident reporting, weights and vital signs and progress notes are auto linked to and from the P6 care system.

Fully integrated with medication data and script

Our medication system supports accurate prescribing and pharmacy data syncing to ensure accurate administration prompts and management.

A complete management system, with quality reporting

Includes 9 Rights' compliant charts, with reviewing and full reporting features and administration process.

Maintains accurate records

All administration actions supported for nurses and carers including counter signing, bulk admin, PRN alerting and more.

Addressing data accuracy and security needs

P6Med also supports the security necessary to handle the exchange of sensitive data between your organisation, the pharmacy and dispensing services.

P6Mobile

Manage the complete lifecycle of care, at the point of care

The P6Mobile App is device and location independent – Android, IOS, reflecting organisation determined forms and content

Features

Care information at your fingertips

At point of care, enter details into configurable daily charts, progress notes, weights and vitals, capture wound and infection details and photos - enabling care staff to capture and distribute timely, accurate and complete details from the bedside in real time.

Reflects the organisations' forms always

No matter what changes you make to your form designs, the App will always reflect your form changes without intervention.

Operational information as you move around

Record hazards, risks, quality issues and maintenance requests as you walk around using the P6Mobile App.

Better care

Save staff time and support them to focus on providing personalised care with the summary care plan available through one touch.

On the spot connection, simple to use

Real-time access to data supports better decisions. P6Mobile seamlessly integrates with the Platinum6 platform, delivering an enriched user experience. Organisations manage the App questions and content through Platinum6.

Automatically updated

Once information has been uploaded onto P6Mobile, it automatically alerts and updates in all areas of the Platinum6 system.

Products

P6Finance

Finance connected to your care network

A fully integrated finance solution specifically created for the health and aged care sector

Features

Accounts Receivable, Accounts Payable, Trust Accounts, basic General Ledger and Care Budgets.

The very latest care, web-browser based, configurable finance management system available. Includes billing deposits management, prudential reporting and more, supporting compliance for residential care, retirement villages, domiciliary care, supported living and other services. From tracking bed days via the care system and linking to your configurable chart of accounts/ledgers, P6Finance covers your financial management needs, but can also export to Enterprise GL's.

Individualised fees options

Individual resident/client financial profiles linked to previously entered admin/care information, enables client specific charge elements and subsidy amounts to be profiled, invoiced, reconciled and reported.

Subsidies

All subsidies – regardless of source – can be apportioned per resident/client, reported on, bulk invoiced, receipted and reconciled against monthly statements. Consumables can be auto set to invoice or be recorded as used.

Trust accounting, personal budgets, petty cash

Fully interfaced to manage petty cash, trusts and budgets.

P6Pharm

Communicate directly with your pharmacist

Designed with simplicity in mind, P6Pharm is a fast and smart way for your facility to always be in contact

Features

Easy access

Access P6Pharm easily from four different areas of the Platinum6 platform.

Message creation

Create multiple messages with a single session or auto generate messages containing medication and signature details.

Message handling

P6Pharm provides the means for your pharmacist to view all sent and received messages and eliminates the need for phone and fax orders.

Live chat

Staff can access a live chat room to send orders for goods and medications directly to your pharmacist's desktop.

Cost effective

P6Pharm is a cost effective and efficient way to support medication compliance.
